

## Product Specification Sheet

# Foam Grade 30-130

### Scope

The material defined by this specification is flexible cellular polyether foam.

### Grade Identification

Future Foams grades are identified by an industry common coding system.

This coding system specifies a foams density and its hardness.

The first two numbers represent the density of the foam grade, and the numbers after the dash represent the hardness of the foam.

### Conditioning

All test specimens shall be conditioned according to AS2282.1 and AS2282.2
