

ENVIRONMENTAL POLICY

Future Foams is committed to protecting community living standards and the environmental heritage, seeking to conduct a profitable business with a commitment to protecting the quality of the air, water and soil environments and seeks to prevent pollution and minimise the environmental impact of all its operations.

The Future Foams Management Team shall promote high standards of environmental practice and monitor environmental performance. The Management Team will co-ordinate the implementation of an effective Environmental Management Programme throughout all parts of the business which:

- Requires compliance with local environmental legislation as a minimum.
- Maintains environmental monitoring programmes.
- Maintains plant and equipment which protects the environment.
- Implements waste minimisation and proper waste handling procedures.
- Educates and motivates the workforce in relation to the environment.
- Encourages suppliers, vendors and contractors to have similar standards to our own company.
- Strives to minimise all environmental impacts of the organisations operations and products.
- Is integrated with other operational systems such as health and safety.

This policy will be regularly reviewed in the light of legislation and company changes.
